

Codimar is one of the largest manufacturers of rollers and conveyors integrated in Spain. Dedicated to optimizing production and expanding at a level worldwide, with more than two decades of experience and knowledge at a global level.

## AT A GLANCE

### CONTEXT:

- Accelerate customer delivery times and quickly adapt to market needs.
- Constantly optimize product quality and reduce costs.
- Improve customer satisfaction through improved communication.
- Drive participation among employees, integrators and international clients.
- Train your entire staff by improving the efficiency of in-person training.

### BENEFITS

Cuartari contributes to Codimar:

- Experience and specialized knowledge in industrial transformation processes.
- Personalized approach adapted to the needs and objectives of the company.
- Improvement in operational efficiency and optimization of workflows.
- Implementation of advanced technology to automate and digitize processes.
- Measurable and sustainable results, with a focus on efficiency, quality and customer satisfaction.

"With Cuartari, Codimar exceeds customer expectations through fast delivery and transparent communication".

**Daniel Angulo García**  
CHIEF Digital Officer

## CHALLENGES

In 2023, Codimar faced substantial challenges, leading the company to recognize the need for an industrial organization transformation and a digitalization of its processes.

Challenges such as **manufacturing errors, delivery times to domestic and international customers,** and high **labor costs** demanded immediate attention at all professional levels.

Without a focus on continuous improvement and digitalization, these issues could further aggravate operational efficiency and limit Codimar's growth.

## SOLUTIONS

- **Optimización del proceso de fabricación:** Optimization of the manufacturing process: Cuartari has identified opportunities to improve efficiency and productivity in manufacturing by minimizing bottlenecks.
- **Improvement in product quality:** Cuartari has introduced stricter quality control procedures to ensure that the rollers meet the required standards.
- **Cost reduction:** Cuartari has simplified processes and optimized the consumption of materials and resources.
- **Monitoring and control systems:** Cuartari has introduced KPI systems that ensure greater control over the process, allow identifying possible deviations or incidents and taking corrective and preventive measures quickly and efficiently.
- **Innovation in design:** Cuartari has contributed new ideas and approaches in the design of the rollers, as well as in the selection of the materials used.
- **Innovative product configuration:** updating the product configuration with Application Identifiers facilitated the adoption of "big data" in Codimar.
- **Comprehensive training of the KAIZEN teams:** it was possible for plant workers to learn advanced Kaizen methods and for the intermediate level to become Black Belts.

**En tan solo seis meses, todos los participantes se transformaron en agentes de cambio efectivos, liderando mejoras sustanciales.**

## RESULTS

- **52% increase** in manufacturing quality.
- **50% reduction** in delivery time to the customer.
- **35% reduction** in labor costs.
